All of the thousands of law school study guides tout themselves as a means of breaking down the often complex material for students. Unfortunately, however, few are able to accomplish that goal, as the study guides themselves are often almost as large as the casebooks and do little to demystify law school courses. Chemerinsky's text is a refreshing change, as his Federal Jurisdiction

hornbook helps you understand what is universally seen as the hardest course in law school, Federal Courts. Federal Courts is such a difficult class because of the sheer complexity of the material. Sadly, many students, me included, are forced to use Hart and Wechsler's Federal Courts casebook which is itself very difficult to learn from (for reasons I discuss in my review of that book). Many casebooks try to go over too much: they spend time on general principles, certainly, but often get caught up in discussing every single case with some relevance to the course, with less focus on hammering down an understanding of the general principles. Hart and Wechsler is a prime example of this. Their casebook is difficult to digest because there is so much to learn. Their endnotes are filled to the brim with hundreds of cases, many of which are unnecessary to obtain a general understanding of the course. And let's be honest, while these cases might be vital for aspiring future clerks taking Federal Courts, not all of us are clerking for the D.C. Circuit anytime soon. Chemerinsky's hornbook very adequately solves this problem. Of all of the study guides and hornbooks I have perused in law school, Chemerinsky's book helped guide me the most, in what is the hardest class I have taken.
